HEALTHCARE

Since 1954, we have served as general counsel and litigation counsel to the entity now referred to as the Sarasota Memorial Health Care System (a billion dollar entity employing over 3500 employees). During the intervening years, our Healthcare practice has expanded beyond the institutional setting to serve the business needs of a very wide range of healthcare entities, including physicians, medical groups, ambulatory surgical centers, assisted living and skilled nursing facilities, home health agencies and hospices, and medical information and technology companies.

Our Healthcare practice encompasses financing, real estate, litigation, labor and employment, regulation, licensure, and compliance.
