TAX

Our Tax practice serves clients in corporate, real estate investment, executive compensation, and estate planning and administration contexts. Typically, our tax work involves structuring corporate or real estate transactions to minimize federal or state taxes or designing business succession strategies for sophisticated estate plans.

We represent clients during the tax audit process, before the Internal Revenue Service Office of Appeals, before the Internal Revenue Service National Office in connection with requests for rulings and technical advice, and before the Florida Department of Revenue in connection with audits, appeals, and ruling requests. We also represent clients before the United States Tax Court and other tax controversy forums.

Our tax practitioners are active contributors to the federal and state tax bar. They regularly present to or participate in panel discussions to educate tax attorneys and CPAs on current topics. They also serve in leadership positions at the national and state levels.
